NOTE TO: C/CSG

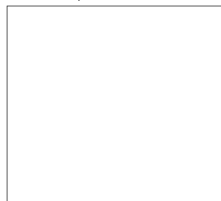

FROM: DD/OIT

Boris

Attached is a proposal which was brought to Ed and me from NPIC. What they essentially are requesting is connectivity to the mainframe through 105 ports or thereabout. Please review the attached documentation and get on my calendar to discuss it sometime this week. Be prepared to address the issue of how many ports we could provide today, how many over the next 90 days, 6 months, 9 months, and a year. The issue here is that we will provide ports. So let's prepare a strategy that will begin to meet NPIC's needs.

If you have any questions, please see me. Thanks

C/OEG

Tom

I think this is an
OEG action. How about
having 100K
into it.

I consider this a
serious short fall,
something which we
must improve in
the near term.

Let me know if
there is any thing I
can do to help.

Please discuss with NHE&
DPG.

1. NAD/C - wants 104 PORTS.
2. Memo says it to suggest arms control issues
however most of the ports seem to be for
DIA applications of common concerns.
3. Need to determine just what the real
needs were the wants are!
4. Who controls the ports!
